New personal API access token

Personal access tokens function like ordinary Lichess OAuth access tokens. They can be used to authenticate to the API over Basic Authentication.

Token description

Kristin_Test

For you to remember what this token is for

Scopes define the access for personal tokens:

- Read preferences
- Write preferences
- Read email address
- Read incoming challenges
- Create, accept, decline challenges
- Read private studies and broadcasts
- Create, update, delete studies and broadcasts
- Create tournaments
- Read puzzle activity
- Join, leave, and manage teams
- Send private messages to other players
- Play games with the board API
- Play games with the bot API

Cancel

✓ ANWENDEN

4) Danach Token kopieren und verschicken.

✓ Korrekt

You can make OAuth requests without going through the authorization code flow.

Instead, [generate a personal token](#) that you can directly use in API requests.

Be careful, these tokens are like passwords so you should guard them carefully. The advantage to using a token over putting your password into a script is that a token can be revoked, and you can generate lots of them.

Here's a [personal token app example](#) and the [API documentation](#).

Make sure to copy your new personal access token now.
You won't be able to see it again!
